

## Leading Innovation in Genetically-designed Vaccines

BioNet is a vaccine manufacturer specializing in the development of recombinant and mRNA vaccines against respiratory diseases and other global public health threats. BioNet has a strong track record with development and biomanufacturing, having advanced many proprietary recombinant pertussis vaccines from early R&D to licensure. It currently markets multiple vaccines through its established commercial network. BioNet has been rapidly expanding its operations across Asia, Europe and North America.

### Recombinant Technology

- aP
- TdaP
- SARS-CoV-2
- Dengue

### mRNA Technology

- Pan-SARS-CoV
- Influenza
- Respiratory Syncytial Virus
- Zika

Fully-integrated vaccine organisation

240+ collaborators sharing their passion for vaccines

Advisory boards with eminent scientists and industry leaders

GMP PIC/s plant for end-to-end manufacturing of recombinant vaccines

Only manufacturer of recombinant pertussis vaccine

Global R&D collaborations

BioNet-Asia Co., Ltd.

📍 19 Soi Udomsuk 37, Sukhumvit 103 Road, Bangjak, Prakanong, Bangkok 10260, Thailand
